ŠKODA KODIAQ

Material: TPE

Practical accessory | Protection | Tests

These easy-to-insert all-weather mats from the ŠKODA Original Accessories range are an ideal addition to any vehicle – especially during inclement weather, when the vehicle interior is really put to the test. Made from **high-quality TPE material**, they are perfect for the job. Thanks to their custom-fit shape, they perfectly cover the footwell floor. The mats **trap any dirt and moisture**, and are non-slip and easy to wash. The key benefit of these mats is the **raised edge** which is able to **trap** any moisture and **dirt**. The mats can be taken out and cleaned at any time, using a commercially available cleaning agent, if required. Rigorous **performance tests** – carried out by ŠKODA as part of a long-range test drive of more than 30,000 km – **have shown the mats to have a long service life and excellent resistance to wear and tear**. They can be changed simply by removing the old mats and laying the new ones in place. For safety reasons, placing mats on top of one another is prohibited.
